

PRINCE RAJ

+91-9508332063 — princerajd7@gmail.com — Codolio — GitHub — LeetCode — LinkedIn

Summary

Computer Science student with strong knowledge of Java, SQL, Data Structures, Algorithms, and AI/ML. Skilled in building full-stack applications using web technologies, with a focus on problem-solving and developing real-world solutions.

Education

B.Tech in Computer Science and Engineering

Sep 2023 – Jun 2027

Galgotias University, Greater Noida, India

CGPA: 9.07/10

Senior Secondary Education (XIIth Class)

Jul 2022 – Jun 2023

R.D.S College, Muzaffarpur, Bihar, India

Percentage: 72.4%

Skills

Programming Languages: Java,

Web Technologies: HTML5, CSS3, JavaScript

Databases: MySQL

Tools: Git, GitHub, Hugging Face, VS Code, Anaconda

Other: Data Structures and Algorithms

Soft Skills: Teamwork, Leadership, Time Management

Projects

Smart Agriculture System

Deployed: Live Mar 2026 – Present

Python, Flask, JavaScript, CNN, HTML5, CSS, PostgreSQL

- Built a smart agriculture platform with 3 AI models, including a CNN-based crop disease detector (72% accuracy), crop recommendation system, and AI chatbot.
- Deployed ML models on Hugging Face and developed a full-stack application using Python, Flask, JavaScript, HTML5, CSS, and PostgreSQL.
- Applied computer vision, NLP, and agricultural analytics to deliver AI-powered disease detection and crop recommendations.

Nexus AI Governance Platform

Deployed: Live Apr 2026 – Present

Python, Streamlit, OpenAI, Supabase, PostgreSQL, RAG

- Built an AI governance platform for policy compliance auditing, risk assessment, and automated governance workflows.
- Integrated AI agents with Retrieval-Augmented Generation (RAG) pipelines to analyze policies, generate compliance recommendations, and automate decision support.
- Implemented PII detection with Supabase PostgreSQL to strengthen data security and governance.

Internship

AI & Machine Learning Intern

Sept 2025 – Oct 2025

TechieHelp – ML Developer

- Applied AI/ML concepts and AWS tools during internship projects involving machine learning applications.
- Developed a Forest Fire Prediction model using Python and machine learning algorithms.
- Analyzed structured datasets using SQL for efficient data processing and feature extraction.

Certifications

- Artificial Intelligence Primer Certification (Infosys) Jun 2025

Honors & Achievements

- Hack4Health Hackathon, IIIT Delhi – Finalist (Jul 2025): Developed an AI/ML-based solution focused on preventive healthcare and patient well-being
- Hackloop, ThoughtWorks, Gurugram (1st Runner-up, Jun 2025): Built an AI-driven prototype addressing real-world social impact with practical deployment
- Achieved a peak contest rating of 1810+ on LeetCode, demonstrating strong problem-solving and algorithmic skills
